13.

COMPREHENSION BASED QUESTION

Read the following passage and answer the questions that follow :

Vikings were the seafaring Norse people from southern Scandinavia (present-day Denmark, Norway and Sweden) who from the late 8th to late 11th centuries raided, pirated, traded and settled throughout parts of Europe, and explored westward to Iceland, Greenland, and Vinland. In the countries they raided and settled, the period is known as the Viking Age, and the term 'Viking' are commonly includes the inhabitants of the Norse homelands. The Vikings had a profound impact on the early medieval history of Scandinavia, the British Isles, France, Estonia, Kievan Rus' and Sicily. Expert sailors and navigators aboard their characteristic long ships, Vikings voyaged as far as the Mediterranean, North Africa, the middle East, and were the first Europeans to reach North America. While spreading Norse culture to foreign lands, they simultaneously brought home foreign cultural influences to Scandinavia, profoundly influencing the historical development of both. During the Viking age the Norse homelands were gradually consolidated from smaller kingdoms into three larger kingdoms. Denmark, Norway and Sweden. The Vikings spoke Old Norse and made inscriptions in runes. For most of the period they followed the Old Norse religion, but later became Christians. The Vikings had their own laws, art and architecture. Most Vikings were also farmers, fishermen, craftsmen and traders.

1. For their explorations, the Vikings used

- (a) longships
- (b) warships
- (c) galleys
- (d) boats

Ans. (a) : उपरोक्त Passage के भाव के अनुसार रिक्त स्थान में 'Longships' का प्रयोग होगा।

Correct Sentence-

For their explorations, the Vikings used Longships.

2. The country of Denmark was formed during the

- (a) Middle age
- (b) Viking age
- (c) Norse homelands
- (d) Pre-historic age

Ans. (b) : उपरोक्त Passage के भाव के अनुसार रिक्त स्थान में 'Viking Age' का प्रयोग होगा।

Correct Sentence-

The country of Denmark was formed during the Viking Age.

3. The Vikings originally followed the religion of

- (a) Africans
- (b) Russians
- (c) Christians
- (d) Old Norse

Ans. (d) : उपरोक्त Passage के भाव के अनुसार रिक्त स्थान में 'Norse' का प्रयोग होगा।

Correct Sentence-

The Vikings originally followed the religion of Old Norse.

Read the following passage and answer the questions that follow :

A fire ship or fireship, used in the days of wooden rowed or sailing ships, was a ship filled with combustibles, or gunpowder deliberately set on fire and steered (or, when possible, allowed to drift) into an enemy fleet, in order to destroy ships, or to create panic and make the enemy break formation. Warships of the age of sail were highly vulnerable to fire. Made of wood, with seams caulked with tar, ropes greased with fat, and stores of gunpowder, there was little destroyed many ships, so fire ships presented a terrifying threat. Fire ships were most devastating against fleets which were at anchor or otherwise restricted in movement. At sea, as well-handled ship could evade a fire ship and disable it with cannon fire. Other tactics were to fire at the ship's boats and other vessels in the vicinity, so that the crew could not escape and therefore might decide not to ignite the ship, or to wait until the fire ship had been abandoned and then tow it aside with small manoeuvrable vessels such as galleys. Fireships were used to great effect by the outgunned English fleet against the Spanish Armada during the Battle of

Gravelines, the Dutch Raid on the Medway, the Chinese in the Battle of Red Cliffs, and by the Greeks in the Greek War of Independence. From the beginning of the 19th century, steam propulsion and the use of iron, rather than wood, in shipbuilding gradually came into use, making fire ships less of a threat.

4. Fireships were filled with

- (a) fire (b) dirt
(c) gunpowder (d) fuel

Ans. (c) : उपरोक्त Passage के भाव के अनुसार उपरोक्त प्रश्न के रिक्त स्थान में 'Gunpowder' का प्रयोग होगा।

Fireships were filled with Gunpowder.

5. Ships, during the age of sail, were made of

- (a) sail (b) wood
(c) iron (d) steel

Ans. (b) : उपरोक्त Passage के भाव के अनुसार उपरोक्त प्रश्न के रिक्त स्थान में 'Wood' का प्रयोग होगा।

Ships, during the age of sail, were made of wood.

6. The Spanish Armada was fought between the Spanish and the

- (a) Chinese (b) Dutch
(c) English (d) Greeks

Ans. (c) : उपरोक्त Passage के भाव के अनुसार प्रश्न के रिक्त स्थान में 'English' का प्रयोग होगा।

The Spanish Armada was fought between the Spanish and the English.

Directions : Read the passage carefully and answer the corresponding questions: (41-43)

Nehru's was a many-sided personality. He enjoyed reading and writing books as much as he enjoyed fighting political and social evils or resisting tyranny. In him the scientist and the humanist were held in perfect balance. While he kept looking at social problems from a scientific standpoint, he never forgot that we should nourish the total man. As a scientist, he refused to believe, in a benevolent power interested in men's affairs; but, as a self-proclaimed non-believer, he loved affirming his faith in life and the beauty of nature. Children he adored. Unlike Wordsworth, he did not see them trailing clouds of glory from their recent sojourn in heaven. He saw them as blossoms of promise and renewal, the only hope for mankind.

7. A many-sided personality means

- (a) A complex personality
(b) A secretive personality
(c) A person having varied interests
(d) A capable person.

Ans. (c) : According to the passage as given in second sentence of paragraph, Pt Nehru enjoyed reading, writing, fighting, political and social evils shows that the word "many sided personality" refers to a person having varied interest.

8. Pt. Nehru enjoyed

- (a) Reading and writing books.
(b) Fighting political and social evils.
(c) Resisting tyranny.
(d) Doing all these and much more.

Ans. (d) : from the first half part of the paragraph confirms that Pt Nehru loved reading. Writing books, fighting political and social evils and resisting tyranny. Thus the perfect choice would be option (d)

9. Which of the following statements reflects Pt. Nehru's point of view?

- (a) Humanism is more important than Science.
(b) Science is supreme and Humanism is subordinate to it
(c) Science and Humanism are equally important.
(d) There is no common ground between Science and Humanism.

Ans. (c) : The third sentence of the paragraph reflects Pt Nehru's point of view. i.e. "Science and Humanism are equally important". As the third sentence of the paragraph reads, "in him the scientist and the humanist were held in perfect balance".

Directions : Read the passage carefully and answer the corresponding questions : (41-43)

I climbed into bed and rolled myself in my blankets, first extinguishing the light that burned steadily near the door. I lay still trying to get to sleep but my fear made that impossible and soon I sat up in bed peering into the darkness and occasionally glancing at the round window in the side of the ship which seemed like a plate

suspended in the darkness. For an hour I must have sat like this, and then I was suddenly roused, by a drought of cold air. I jumped out of bed; not having allowed for the motion of the ship, I was instantly thrown violently across the room.

10. The author sat peering into the darkness because

- (a) he had put out the light.
- (b) he wished to see the window.
- (c) the window had looked like a plate
- (d) he was afraid.

Ans. (d) : Accordint to the passage, The author sat peering into the darkness because he was afraid.

11. The author jumped out of bed because

- (a) he heard a faint sound.
- (b) he saw someone coming towards him.
- (c) a cold breeze blew past his face.
- (d) he was pushed by someone.

Ans. (c) : Accordint to the passage, The author jumped out of bed because a cold breeze blew past his face.

12. Which one of the following did the author do first?

- (a) Closing the door.
- (b) Climbing into bed.
- (c) Rolling himself into blankets.
- (d) None of these

Ans. (b) : Accordint to the passage, The author do first climbing into bed.

Read the passage and answer the following question.

The komodo dragon (*Varanus komodoensis*), also known as the komodo monitor, is a species of lizard found in the Indonesian islands of Komodo, Rinca, Flores, and Gili Motang. A member of the monitor lizard family Varanidae, it is the largest extant species of lizard, growing to a maximum length of 3 meters (10 ft) in rare cases and weighing up to approximately 70 kilograms (150 lb). To the natives of Komodo Island, it is referred to as ora, buaya darat ('land crocodile'), or biawak

raksasa ('giant monitor'). Komodo dragons were first documented by Europeans in 1910, when rumors of a "land crocodile" reached Lieutenant van Steyn van Hensbroek of the Dutch colonial administration. The first two live Komodo dragons to arrive in Europe were exhibited in the Reptile House at London Zoo when it opened in 1927. The Komodo dragon was the driving factor for an expedition to Komodo Island by W Douglas Burden in 1926. After returning with 12 preserved specimens and two live ones, this expedition provided the inspiration for the 1933 movie King Kong. It was also Burden who coined the common name "Komodo dragon". Researchers have isolated a powerful antibacterial peptide from the blood plasma of Komodo dragons, VK25. Preliminary results of these tests show that DRGN-1 is effective in killing drug-resistant bacterial strains and even some fungi. It has the added observed benefit of significantly promoting wound healing.

13. The named Komodo dragon was coined by ____.

- (a) Douglas Burden
- (b) Hensbroek
- (c) Gili Motang
- (d) Europeans

Ans. (a) : उपरोक्त Passage के अनुसार the named 'Komodo Dragon' was coined by 'Douglas Burden'.

Hence Option (a) is correct answer.

14. DRGN – 1 is obtained from the Komodo Dragon's ____.

- (a) peptide
- (b) plasma
- (c) saliva
- (d) nails

Ans. (b) : उपरोक्त Passage के अनुसार DRGN-1 is obtained the Komodo Dragon's plasma. अतः रिक्त स्थान में 'Plasma' का प्रयोग होगा।

Hence option (b) is correct answer.

15. The Komodo dragon is basically a ____.

- (a) crocodile
- (b) dragon
- (c) lizard
- (d) giant

Ans. (c) : उपरोक्त passage के अनुसार the komodo dragon is basically a lizard. अतः रिक्त स्थान में 'Lizard' का प्रयोग होगा।

Hence option (c) is correct answer.

Read the passage and answer the following question.

Scholarly interest in earthquakes can be traced back to antiquity. In 132 CE. Zhang Heng of China's Han dynasty designed the first known seismoscope. The Lisbon earthquake of 1755, coinciding with the general flowering of science in Europe, set in motion intensified scientific attempts to understand the behaviour and causation of earthquakes. From 1857, Robert Mallet laid the foundation of instrumental seismology and carried out seismological experiments using explosives. He is also responsible for coining the word "seismology". Seismology has revealed much about the structure of the Earth's core, mantle, and crust. The English seismologist Richard Dixon Oldham's studies of earthquake records in 1906 led to the discovery of the Earth's core. From studies of the Croatian quake of Oct. 8, 1909 the geophysicist Andrija Mohorovicic discovered the discontinuity (often called the Moho) that separates the crust from than 1,000 seismograph stations around the world, and their data are used to compile seismicity maps.

16. The word "seismology" was coined by _____.

- (a) Andrija Mohorovicic
- (b) Zhang Heng
- (c) Robert Mallet
- (d) Richard Dixon Oldham

Ans. (c) : According to the sense of the passage, the word 'seismology' was coined by Robert Mallet.

Hence option (c) would be correct.

17. The discovery of the Earth's core was a result of studies by _____.

- (a) Andrija Mohorovicic
- (b) Zhang Heng
- (c) Robert Mallet
- (d) Richard Dixon Oldham

Ans. (d) : According to the passage the discovery of the Earth's core was a result of studies by Richard Dixon Oldham.

Hence option (d) is correct.

18. The first known seismoscope was designed by _____.

- (a) Andrija Mohorovicic
- (b) Zhang Heng
- (c) Robert Mallet
- (d) Richard Dixon Oldham

Ans. (b) : In 132 CE, Zhang Heng of China's Han dynasty designed the first known seismoscope.

Hence option (b) is correct.

Comprehension : (Question No. 1-5)

Read the following passage and answer the questions given after it.

India generates at least 25,940 tonnes of plastic waste daily, equivalent to the weight of around 4,300 elephants. Of this, about 60% gets recycled, according to the Union environment ministry. The rest gets dumped in landfills, clogs draings, goes into the ocean as micro-plastics, or is burnt, leading to air pollution.

In the absence of a proper waste management system, the plastics that get recycled are often dirty, which makes the re-cycling process water-intensive and expensive.

"It is the process of cleaning the plastics before recycling that makes it resource intensive. A lot of water is required to wash the collected plastics, especially if it is oily or greasy as it has to be cleaned with a solvent," said Dr Suneel Pandey, director of environment and waste management, The Energy and Resources Institute (TERI).

Experts say proper waste collection and management is at the core of ensuring more plastics get recycled instead of ending up in landfills and oceans.

Researchers from various institutes have come up with innovative ways to utilise the plastic waste that cannot be recycled further or are unrecyclable.

At IIT Delhi, a group of chemical engineers are working on chemically breaking down plastics to its smaller hydrocarbon molecules and then synthesising diesel out of it. The process uses packaging material, Polyethylene terephthalate (PET) bottles, polystyrene, and multi-layer packaging.

The fuel produced can currently be used as a blend in stationary diesel machines like generators and needs further testing and standardisation to be used as commercial diesel in vehicles.

A mix of plastic and stone has been used to create a block that can be used in flooring. A CSIR laboratory also used shredded plastic, chemically treated it and mixed with fillers to make tiles.

A German chemical producer called BASF is also breaking down waste plastic and using it as raw material for chemicals, instead of using material derived from fossil fuels.

One cost-effective solution was developed by Dr Rajagopalan Vasudevan, professor at Thiagarajar College of Engineering in Madurai. The National Highways Authority of India is currently scaling up his technology to use plastic waste with in making roads.

He came up with the idea of mixing plastic waste with Bitumen used for constructing roads in 2001. "That year the Tamil Nadu government had planned to ban plastic and my concern began with the more than 1 lakh people employed by the industry. Since plastic is derived from petroleum just like Bitumen, I thought of using it for road construction. The result, not only plastic waste was getting utilised, the roads were cheaper and steadier," he said. The plastic waste does not have to be segregated and even multi-layered plastics can be used in the mix. "All we need to do is collect the waste, dry it out and use it," he said.

The construction of every kilometre of road required nine tonnes of Bitumen and one tonne of plastic waste. This means for every kilometre of road, one-tonne Bitumen is saved, which costs about ₹ 30,000.

19. Which organization makes blocks and tiles from the plastic waste ?

- (a) CSIR (b) IIT, Delhi
(c) BASF (d) TERI

Ans : (a) According the passage CSIR Organization that makes blocks and tiles from the plastic waste.

20. What has been developed by Dr Rajagopalan Vasudevan, professor at Thiagarajar College of Engineering in Madurai ?

- (a) Method for using plastic to make tiles and blocks
(b) Method for using plastic for road construction
(c) Method for making diesel from plastic waste
(d) Method for extracting raw material for chemicals

Ans : (b) According to passage the method for using plastic for road construction has been by Dr. Rajagopalan Vasudevan, who was professor at

21. Which statement is NOT true according to the passage ?

- (a) The National Highways Authority of India is planning to use plastic waste in making roads.
(b) The fuel produced from plastic waste can be used as a blend in stationary diesel machines like generators.
(c) In the construction of one kilometer of road, nine tonnes of bitumen can be saved by using plastic waste.
(d) India generates at least 25,940 tonnes of plastic waste daily.

Ans : (c) According to passage. In the construction of one kilometer of road, nine tonnes of bitumen can be saved by using plastic waste. This statement is not true.

22. The above passage mainly talks about

- (a) The problems of recycling plastic waste.
(b) The need of research to manage plastic waste.
(c) The plastic waste generated in India.
(d) Putting the plastic waste to use by recycling.

Ans : (d) According to the sense, the passage mainly talks about putting the plastic waste to use by recycling.

23. What makes the recycling of plastic resource-intensive ?

- (a) The breaking down of plastic in molecules
(b) The research required for recycling
(c) The cleaning of the plastic waste
(d) The collection of plastic waste

Ans : (c) According to passage the cleaning of the plastic waste makes the recycling of the plastic resource-intensive.

Comprehension : (Question No. 6-10)

Read the given passage and answer the questions that follow :

For years, a long-lost chapter of what is said to be the words's first known novel has been quietly tucked away in a chest in a Japanese storeroom, hiding alongside other heirlooms of a Japanese family with feudal lineage. Experts confirmed that the blue-bound text is a chapter of the 11th Century Japanese classic 'Genji Monogatari' or 'The Tale of Genji'. Written by Japanese noblewoman Murasaki Shikibu, the novel depicts the romantic epic of Prince Genji and his love interest Muraski-no-ue. The recently found chapter contains an important part of the novel in which the 18 year old prince meets Murasaki-no-ue, according to the Japan Times. The original 54 chapter text no longer exists. Transcriptions by Fujiwara no Teika (1162-1241),

a Japanese poet, are believed to be the earliest existing manuscripts. In addition to the most recently discovered chapter, four other confirmed chapters of her transcription are registered as national cultural properties. Reizeike Shiguretei Bunko, a cultural preservation foundation, has authenticated the text as a chapter of Teika's transcriptions.

In February, 72 year old Motofuyu Okochi found the little book in his family home in Tokyo and reached out to the foundation to have it authenticated.

Okochi's lineage stretches back to the feudal era of Japan when, in 1743, the manuscript was passed to the Okochi family from another family, according to Asahi Shimbun.

The experts who examined the found chapter were able to confirm that the text is one of Teika's transcriptions in a few ways.

Not only did the handwriting match that of the other found chapters, but the cover of the binding matches the blue of the other texts. The small slip of paper that Teika used to identify the front of the book also matches the slips used on the other chapters.

24. Where was the chapter discovered?

- (a) In a cultural foundation
- (b) In a royal palace
- (c) In a library in Tokyo
- (d) In a family storeroom

Ans : (d) The chapter was discovered in the Japanese storeroom. First line of the passage makes it clear.

25. Which of the following was NOT one of the ways for confirming of the authenticity of the chapter?

- (a) The handwriting matched that of the other chapters
- (b) The binding cover was of the same colour
- (c) The slip used by the manuscript writer was similar to the slips on other chapters
- (d) The name of the writer was inscribed on it as also on the earlier chapters

Ans : (d) उपन्यास पर लेखक का नाम पूर्ववर्ती अध्यायों में अंकित था' यह कथन गद्यांश में कही भी उल्लिखित नहीं है। अतः विकल्प (d) प्रश्न का अभीष्ट उत्तर होगा।

26. How many chapters of the novel have been listed as cultural properties ?

- (a) Five
- (b) Eighteen
- (c) Fifty-four
- (d) Eleven

Ans : (a) गद्यांश के प्रथम खण्ड के अंतिम वाक्य-In addition to the most — cultural properties से स्पष्ट है कि Cultural properties (सांस्कृतिक विरासत) में पाँच अध्याय दर्ज थे।

27. Which of the following is NOT true according to the passage ?

- (a) The home where the book was kept safely belonged to a feudal family.
- (b) The Japanese novel is important because it is believed to be the oldest known novel.
- (c) The man who found the chapter decided to hand it over to the cultural foundation.
- (d) The original manuscript written by Murasaki-no-ue was bound in blue.

Ans : (d) गद्यांश के अनुसार विकल्प (d) शुद्ध नहीं है क्योंकि मूल पाण्डुलिपि Murasaki no-ue की है। गद्यांश के प्रथम खण्ड के द्वितीय एवं तृतीय पंक्ति से स्पष्ट है।

28. Who was the author of the novel ?

- (a) Fujiwara no Teika
- (b) Motofuyu Okochi
- (c) Murasaki Shikibu
- (d) Reizeike Shiguretei Bunko

Ans: (c) गद्यांश के प्रथम खण्ड के द्वितीय एवं तृतीय पंक्ति expert confirmed that से स्पष्ट है कि उपन्यास का लेखक Murasaki Shikibu है।

Comprehension: (Question No. 11-15)

Read the following passage and answer the questions that follow.

During the decade after liberalisation floriculture industries took giant steps in the export arena. This era has seen a dynamic shift from sustenance production to commercial production. The area under floriculture production in India is around 249 thousand hectares with a production of 1659 thousand tonnes loose flowers and 484 thousand tonnes cut flowers. Floriculture is now commercially cultivated in several states with Tamil Nadu (20%), Karnataka (13.5%) West Bengal (12.2%) having gone ahead of other producing states like Madhya Pradesh, Mizoram, Gujarat, Andhra Pradesh, Odisha, Jharkhand, Haryana, Assam and Chhattisgarh.

Government of India has identified floriculture as a sunrise industry and accorded it 100% export oriented status. Owing to steady increase in the demand of flowers, floriculture has become one of the important commercial trades in agriculture. Hence commercial floriculture has emerged as hi-tech activity-taking place under controlled climatic conditions inside greenhouse.

Floriculture in India, is being viewed as a high growth industry. Commercial floriculture is becoming important from the export angle. The liberalisation of industrial and trade policies paved the way for development of export-oriented production of cut flowers. The new seed policy had already made it feasible to import planting material of international varieties. It has been found that commercial floriculture has higher potential per unit area than most of the field crops and is therefore a lucrative business. Indian floriculture industry has been shifting from traditional flowers to cut flowers for export purposes. The liberalised economy has given an impetus to the Indian entrepreneurs for establishing export oriented floriculture units under controlled climatic conditions.

Indian floriculture industry comprises of flowers such as Rose, Tuberose, Glads, Anthurium, Carnations, Marigold etc.

India's total export of floriculture was Rs. 571.38 crores/\$81.94 million in 2018-19. The major importing countries were United States, Netherlands, United Kingdom, Germany and United Arab Emirates. There are more than 300 export-oriented units in India. More than 50% of the floriculture units are based in Karnataka, Andhra Pradesh and Tamil Nadu. With the technical collaborations from foreign companies, the Indian floriculture industry is poised to increase its share in world trade.

29. The main theme of the passage is:

- (a) The export of flowers from India
- (b) Commercialization of floriculture
- (c) The rise of floriculture industry in India
- (d) The Government's policies regarding floriculture

Ans. (c) : According to passage the main theme of the passage is "The rise of floriculture industry in India."

30. The area under floriculture production in India is about:

- (a) 571 thousand hectares
- (b) 1659 thousand hectares
- (c) 249 thousand hectares
- (d) 484 thousand hectares

Ans. (c) : According to passage the area under floriculture production in India is about 249 thousand hectares.

31. Which of the following statements is NOT true according to the passage?

- (a) India's total export of floriculture was \$571.38 million in 2018-19.
- (b) More than 50% of the floriculture units are based in Karnataka, Andhra Pradesh and Tamil Nadu.
- (c) Floriculture has been identified as a sunrise industry by the Government of India.
- (d) Floriculture has been accorded a 100% export status by the Government.

Ans. (a) : According to passage India's total export of floriculture was Rs. 571.38 crores/\$81.94 million in 2018-19. Hence option (a) is wrong statement and it is correct answer.

32. What gave a major fillip to the export of Indian floriculture products?

- (a) The new policy to ease the import of seeds of international varieties
- (b) The liberalisation of industrial and trade policies by the government
- (c) The use of technology in cultivating flowers inside greenhouses.
- (d) The demand from many countries like the US, the UK, and UAE.

Ans. (b) : According to passage the liberalisation of industrial and trade policies by the Government gave a major fillip to the export of Indian floriculture products.

33. Which three states are the major cultivators of floriculture products?

- (a) Tamil Nadu, Assam and Chhattisgarh
- (b) Tamil Nadu, Karnataka and West Bengal
- (c) Karnataka, Gujarat and Andhra Pradesh
- (d) West Bengal, Andhra Pradesh and Odisha

Ans. (b) : According to passage in India three state are the major cultivators of floriculture products - Tamil Nadu, Karnataka and West Bengal

Comprehension: (Question No. 16-20)

Read the given passage and answer the questions that follow.

Fishing traps, baskets, cradles, bridges, rainproof hats and umbrellas, mats, musical instruments, water pipes—Indians have always used the bamboo in numerous ways. It is used for house construction, fencing and in the making of bullock carts. Low-cost domestic furniture and a vast range of domestic utility items made of bamboo can be easily seen in any of our bazaars. But we do not easily notice the countless little ways this modest material comes to be used by rural

people. One can see it being used in the blacksmith's bellows, or as bamboo pins in carpentry joints or in the fabrication of toys in village markets. But to the British foresters the multidimensional role that "the forest weed" played in the local Indian environment was of no account, as it did not figure in forest revenues. Bamboo also interfered with the growing of teak, an essential part of their colonial forest policy. It was only in the 1920s that the British realised that by mincing bamboo into millimetre shreds, cooking it in chemicals, pulping and flattening it, they could produce sheets of paper. This would bring the British increased forest revenue and 'development' (as defined by them) to the so-called backward regions of India. However, they chose to ignore the consequences this activity would have on the health of the forest. So while bamboo was sold at high prices to basket weavers, it was heavily subsidised for the paper industry. Even after Independence, supplying bamboo at extremely low prices to Indian paper mills became a 'patriotic' duty of the government, and bamboo supplies were assured for decades at unchanged prices. The disaster that this would cause to the forests, and to the craftsman, still remained unforeseen.

Colonialism affected forests all across India and marginalised their inhabitants and the traditional occupations they practised. As late as the 1970s, the World Bank proposed that 4,600 hectares of natural Sal forest should be replaced by tropical pine to provide pulp for the paper industry. It was only after protests by local environmentalists that the project was stopped. Colonialism was therefore not only about repression, it was also a story of displacement, impoverishment and ecological crisis.

34. Bamboo is referred to as 'modest material' because:

- (a) It can be easily shredded and reduced to a pulp
- (b) It is inexpensive and not highly acclaimed
- (c) The British believed it was worthless
- (d) It is available in abundance in India

Ans. (b) : Passage के अन्तर्गत दिये गये प्रश्न 'bamboo is referred to as modest material' because विकल्प - (b) it is inexpensive and not highly acclaimed अर्थात् बाँस एक मामूली सामग्री है क्योंकि यह एक सस्ती और उच्च प्रशंसित नहीं है। उक्त कथन passage की 5वीं पंक्ति में this modest material comes to be used by rural people प्रदान किया गया है।

35. What does the 'forest weed' refer to?

- (a) Sal
- (b) Teak

- (c) Bamboo
- (d) Pine

Ans. (c) : According to the passage, the 'forest weed' refer to Bamboo. Hence option (c) would be correct. शेष विकल्प अभीष्ट उत्तर नहीं है जो इस प्रकार है-

Sal – शाल (वृक्ष)

Teak – सागौन, (वृक्ष)

Pine – दवदार (वृक्ष)

36. What was considered to be a patriotic duty of the government after independence?

- (a) Preventing the displacement of foresters
- (b) Handling the ecological crisis in India
- (c) Replacing Sal forests by tropical pines
- (d) Supplying bamboo at low prices to paper mills

Ans. (d) : According to the passage कि 'A patriotic duty of the government after independence was considered supplying bamboo at low prices to paper mills.' जो passage की 17th and 18th line में clearly व्यक्त किया गया है। शेष उत्तर विकल्प अभीष्ट नहीं है।

37. Which of these is NOT a step in the production of paper?

- (a) Mincing
- (b) Pulping
- (c) Weaving
- (d) Flattening

Ans. (c) : According to the passage, 'weaving' is not a step in the production of paper. Hence option (c) would be correct.

Mincing – काटकर टुकड़े करना

Pulping – गूदा बनाना, लुगदी बनाना

Flattening – चौरस करना।

38. The varied uses of bamboo were disregarded by the British till the 1920s because:

- (a) They did not use bamboo products at all
- (b) It did not increase the forest revenue
- (c) It was used in the backward regions only
- (d) The bamboo products were cheaply available

Ans. (b) : दिये गये प्रश्न का proper answer विकल्प - (b) में 'it did not increase the forest revenue' अर्थात् क्योंकि बाँस के भिन्न प्रयोगों ने जंगल से होने वाली धन प्राप्ति को increase नहीं किया जो passage के अन्त में प्रदत्त sentences के भावों में निहित है। शेष विकल्प अभीष्ट उत्तर नहीं है। Hence the option - (b) is the correct answer.
